Singer Kwinter Personal Injury & Insurance Claim Lawyers

Tamara Gordon

## **PRESIDENT'S MESSAGE**

It is once again my pleasure and privilege to deliver this message as President of the Tamara Gordon Foundation. This is the 8th occasion on which the Foundation is awarding scholarships to post-secondary students who have a physical disability.

To those unfamiliar with our Foundation, here is a very quick synopsis. When Tammy was 16, she went on a ski day with her high school. Although a beginner, she was allowed to ski down a large hill. Tammy suffered a catastrophic injury which has confined her to a wheelchair for life. Tammy did not allow her injury to stand in her way. She went on to York University graduating Cum Laude and making the Dean's List. Realizing the challenges facing disabled students, Tammy decided to create a foundation that would provide financial assistance to students who have a physical disability.

This past year and a half have certainly been an unprecedented challenge to everyone and particularly to organizations such as ours which depend on the generosity of others for our ongoing work. Yet in spite of Covid, our Foundation forged ahead with its fundraising efforts, and I am delighted and very proud to announce that this year the Tamara Gordon Foundation is awarding 26 scholarships to students from 13 different academic institutions within Ontario. And as it has done in the past, the 4 scholarships awarded to Students at Ryerson University will be matched by Ryerson.

Consider how far the Foundation has come since its founding in 2013 where at our first awards ceremony in 2014, 6 scholarships were awarded. None of this would have been possible without the incredible efforts of Tammy herself and great unstoppable driving force of Tammy's dear wonderful mother Marcia Gordon.

The Foundation's work would also not be possible without the tireless efforts of our great Board and of course our generous donors who provide the fuel that keeps us running.

One person who also deserves special mention is my predecessor, the Foundation's inaugural President Mr. Robert Tiffin who was then Vice President Students at York University. It was Rob's untiring efforts that helped launch the Foundation and his immense contribution can never be forgotten.

I want to extend a very special thank you to our major donors and sponsors:

Joshua Fogah

Marcia Gordon

Tamara Gordon

Judy Samuels

Patricia Wynter

Singer Katz LLP Personal Injury & Insurance Lawyers

Singer Kwinter Personal Injury & Insurance Claim Lawyers

TD Bank Group

As it did last year, the pandemic has unfortunately prevented the Foundation from holding our annual in-person awards ceremony. Let us all hope that the worst days are behind us and that in 2022 we will all be able to be together again, enjoy each other's company and celebrate with our student honourees.

Wishing everyone the very best.

Alf Kwinter

## 2021 Scholarship Recipients

Riley Ambrose	Award Donated by Singer Kwinter, Personal Injury & Insurance Claim Lawyers
Samuel Aror	Award
Oghenetega Aror	Award Donated by Singer Kwinter, Personal Injury & Insurance Claim Lawyers
Saman Bagheri	Award Donated by Malvern Christian Assembly
Kavisha Barran	Award Donated by Malvern Christian Assembly
Paige Fawcett	Award
Kate Folsetter	Award
Beau Hayward	Award Donated by Malvern Christian Assembly
Sharon Henry	Award
Ludmila Irvine	Award Donated by Mr. Joshua Fogah
Amyr Jiwani	Award Donated by Singer Katz LLB, Personal Injury & Insurance Lawyers
Shanjay Kailayanathan	Award Donated by Miss Tamara Gordon, TGF Founder
Joshua LeBlanc	Award Donated by Mr. Yuhua Xia
Wesley Magee-Saxton	Award Donated by TD Bank Group
Jeffrey Man	Award Donated by TD Bank Group
Andrew Molas	Award
Logan Pickells	Award Donated by Singer Kwinter, Personal Injury & Insurance Claim Lawyers
Tanya Quesnel	Award Donated by TD Bank Group
Waffa Qurbani	Award Donated by Miss Judy Samuels
Ashley Ramadhan	Award
Matthew Tracey	Award
Dean Wardak	Award Donated by TD Bank Group

## 2021 Recipient Biographies

### Riley Ambrose

Riley Ambrose is entering his third year in Business Administration and Philosophy at Trent Durham University. At the age of ten, he was diagnosed with Facioscapulohumeral Muscular Dystrophy (FSHD), a genetic muscle disorder that progressively atrophies the muscles in his body. He is a member of the Trent Durham Student Association Board of Directors, as well as the incoming Co-Chair of the Youth Advisory Council at Holland Bloorview Kids' Rehabilitation Hospital. Riley is also a published policy author and plans to pursue a career in public policy, a tool he believes is key to creating a future that is equitable to everyone.

### Brume Aror

Brume Aror just completed Grade 12 at Port Credit Secondary School. In the fall he will be attending University of Toronto to Study Computer Science. He has Sickle Cell Anemia, a life-threatening blood disorder. Though Sickle Cell is a particularly burdensome and disruptive disease, he is determined to make a significant contribution to society despite his immunocompromised health condition. Prior to the pandemic Brume was a volunteer in his church. Upon graduation, and after gaining valuable experience, he hopes to establish a company that helps people better manage their health.

### Tega Aror

Tega Aror is an undergraduate music student at the University of Western Ontario specializing in voice at the Don Wright Faculty of Music. Tega was diagnosed with Sickle Cell Disease when she was three years old. Although it sometimes felt like Sickle Cell was slowing her down, Tega never let it stop her from pursuing her interests. In the future, she plans to share her abilities and talents in music with as many others as possible. She likes to believe that seeing things this way is how she focuses on her ability instead of her disability.

### Saman Bagheri

Saman arrived in Canada ten years ago with the heartfelt goal of pursuing an education in the health sciences. However, that goal has often been complicated by health challenges, including a series of major surgeries followed by difficult and problematic recoveries. He has ongoing chest wall pain from complications of surgeries that damaged his chest muscles and ligaments. This makes Saman unable to perform sustained activity with his upper body. He also has severe pain with prolonged sitting and walking. Notwithstanding pain and struggles—both physical and psychological—Saman has persisted, and his goal of realizing an education to ultimately support others has become ever stronger. He is a Biomedical Science student at York University.

### Kavisha Barran

Kavisha Barran is 21 years old. She is legally blind due to a genetic and degenerative eye condition called Stargardt's Disease that onset when she was 8 years old. She has a loss of central vision and is very light-sensitive. Kavisha is currently a student at McMaster University in the Honours Bachelor of Social Work program. She is very interested in social issues and wants to work with communities to address these concerns. She also loves spending time with family and friends, playing her ukulele, working out, hiking, and volunteering.

### Paige Fawcett

Paige Fawcett was diagnosed with Cerebral Palsy at 16 months of age, this mostly affects her balance and mobility, but dexterity and endurance are also impacted. Her career goal is in human rights law as an advocate for the disabled community. She has been active in the disability community in her area, playing competitive sledge hockey and kayaking, volunteering with Fishability Sports Club, and lobbying her town council for the need of an accessible dock at their harbour. Paige continues to be a voice for those who need one.

### Kate Folsetter

Kate Folsetter is a student from Hamilton, Ontario who will be attending the University of Ottawa and will be pursuing Conflict Studies and Human Rights. She lives with Developmental Coordination Disorder. It affects the ways in which brain signals are sent to neurons in the rest of the body. It affects coordination in fine motor skills such as writing and gross motor skills which are full body movements, such as jumping and walking. DCD is permanent and affects her coordination, balance, organization, muscle tone, and time management. Despite this Kate doesn't let it stop her from living a positive life.

### Beau Hayward

Beau Hayward is a C4 – C5 incomplete quadriplegic. His injury resulted from a diving accident in 2018. He completed the 1<sup>st</sup> year of his undergraduate studies with a GPA of 3.78 at the University of Toronto. He is pursuing a double major in History and Anthropology. He acquired a position on the Diversity and Equity team and has been working on several initiatives to further accessibility in athletics for students with disabilities. Beau has had the opportunity to speak on several panels as a student initiatives leader, and recently during national accessibility week he was a keynote speaker on an initiative he created called "Your Shape".

## Sharon Henry

In 2007 Sharon was diagnosed with Cognitive Vascular Impairment, (CVI) when she sustained brain trauma, in addition to other disabilities related to mobility and chronic pain. She completed her BA - Double Major with Honors in Law and Society, and Women's Studies, a Diploma in Paralegal Education and a Certificate in Immigration Consultant, from Humber College. She graduated with an MA in Critical Disability Studies at York University, 2017. Sharon presented at Seneca College on the topic: "Violence Against Women with Disabilities" and also at the International Pacific Rim Conference in Hawaii: "Male Violence Against Physically Disabled Women: The North American Context." Sharon's advocacy is extensive, and she is involved in her church.

## Ludmila Irvine

Ludmila (Lucy) Irvine is a mother, a daughter, a student and a person with physical disabilities. Her journey with Multiple Sclerosis has been challenging and rewarding. As someone with physical disabilities, she feels a deep connection to marginalized communities. She has lost vision in her right eye, speech complications, mobility challenges and refuses to give up her dreams. Being disabled does not limit her drive, goals or self-love. She feels that supports are fundamental to success and giving back to the community is important. Lucy volunteers in MS, Childhood Cancer and literacy programs.

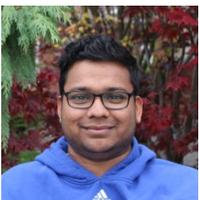

## Amyn Jiwani

Amyn has a genetic condition known as 3-M Syndrome, a skeletal dysplasia (dwarfism) and autosomal recessive disorder whose symptoms include skeletal malformations of the craniofacial area, joint laxity and prominent hyperlordosis (back curvature). Due to its nature, the condition has no cure and continues to impact him on a physical, emotional, and psychological level. Thus, Amyn's overall quality of life has been affected, as tasks like walking and writing have become more difficult. He is currently pursuing Computer Engineering at Ryerson University.

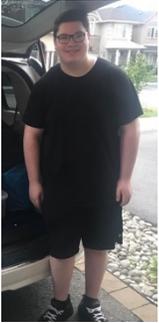

Despite his challenges, Amyn still maintains a positive attitude and caring personality, while having a meaningful and continuous impact on his school and volunteer communities.

## Shanjay Kailayanathan

Shanjay Kailayanathan is a full-time Software Engineering student at Ontario Tech University. Around 9 years ago, he was involved in a motor vehicle accident which rendered him a quadriplegic. He is paralyzed from the chest down and has paralysis in his hands/fingers. Despite these difficulties he never gave up his dreams of becoming an Engineer even though his disability made it difficult to do many of his courses. Shanjay has almost reached his dreams of becoming an Engineer and he is thankful for all the supportive people he has in his life, including the Tamara Gordon Foundation. He will continue to do his best and see where life takes him.

## Joshua LeBlanc

Joshua LeBlanc was diagnosed with Hereditary Spastic Paraplegia at five years old. As a child with a disability, it was very difficult to find physical activities to do with friends, but I did not want to give up. Once I was introduced to games programming, I became extremely interested in how they work and what the programming for the game might look like. When choosing a career path, it was an easy decision, I wanted to become a games programmer to bring the joy of inclusiveness games to other children with disabilities. In September 2021, I commenced studying Games Programming at Brock University.

## Wesley Magee-Saxton

Wesley is 21 years old and was born with Cerebral Palsy. As a fifth-year student at York University's Theatre Program in the Acting Conservatory, he is working towards his Bachelor of Fine Arts degree, to graduate in 2022. He is an activist and performance artist who infuses his lived experience into the art he creates. He has been advocating for people with disabilities since he was 10 years old with various organizations to help create awareness and level the playing field. He is working towards his black belt in Taekwondo after 15 years of training.

## Jeffrey Man

Jeffrey was diagnosed with Spinal Muscular Atrophy, a progressive condition that severely impairs all muscles in the body. While working at Holland Bloorview Children's Rehabilitation Hospital, Jeffrey contributed to the development of an organization-wide equity, diversity and inclusion policy and the launch of Project SEARCH Toronto, a transition to employment program for high school students with intellectual disabilities

He has supported people with disabilities through his previous community development and human rights work at Unifor, Canada's largest private-sector union, as well as his current role representing Easter Seals Ontario on the York Catholic District School Board's Special Education Advisory Committee. Jeffrey graduated from the Schulich School of Business at York University with a degree in business administration and is pursuing a Bachelor of Education at York University.

## Andrew Molas

Andrew Molas is a PhD candidate in the Philosophy Department at York University. He earned his Honours Bachelor of Arts in English and Philosophy at the University of Toronto and his Master of Arts in Philosophy at York University.

His research focuses on the role that empathy and narrative plays in our engagement with persons living with mental health challenges. More broadly, he is interested fostering communities where stigma surrounding mental illness is minimized.

He was diagnosed with Multiple Sclerosis (MS) at the beginning of his undergraduate studies in 2007. Due to living with a chronic disability, he is sensitive towards others who are affected by health issues. He is also passionate about teaching and is always looking for ways to make his classrooms as inclusive and barrier-free as possible for all students. Andrew has been a grateful recipient of the Tamara Gordon Foundation scholarship since 2016 in addition to 30 other scholarships.

## Logan Pickells

Logan is 20 years old. He has both Cerebral Palsy and Autism. He is in his first year as a student at the University of Toronto as a History Major with a Minor in Anthropology and Political Science. His aspirations are to become a Historian, published author and a professor one day. Logan volunteers with ErinoakKids as a youth mentor and with the 676 Royal Canadian Army Cadets. While he has faced many struggles, he is grateful for the many blessings that have come his way.

## Tanya Quesnel

Tanya graduated *Cum Laude* from Laurentian University in 2019 with a bachelor's degree in Social Work and a minor in Law and Justice. She is currently pursuing her Master's degree in Social Work. Tanya is passionate about social justice and will work at the structural level providing recommendations to inform future policies. Her Master's Thesis focuses on affordable and accessible housing for individuals with disabilities in Northern Ontario.

At the age of 18 months, she was diagnosed with cerebral palsy spastic diplegia and with non-verbal learning disorder. Tanya is known for her positive attitude, smile and determination. As a Para Nordic athlete in adaptive cross-country skiing, she has raced at national and international level. She contributes to her community by volunteering for various organizations.

## Waffa Qurbani

When Waffa was three years old, she was hit in the head at daycare by a metal tonka truck, after doing many tests at sick kids that day, the doctors told her mom that she had suffered a stroke. The doctors told her mom that her right side will never grow and that she would permanently be in a wheelchair. As a mom herself now, she cannot imagine the fear her mom went through. The stroke left her with a permanent tremor on the right side of her body. Waffa has a 6 year old and a 2 year old, but she does not let her disability stop her from achieving the goals she has in life. She has a positive outlook in life because she wants her kids to know that anything is possible when you put your mind to it! She will be completing her Masters in September and will be starting at Sheridan College in September to get her teaching license. A positive mind set will allow you to do anything.

## Ashley Ramdhan

Ashley Ramdhan is currently working on attaining her Bachelor of Arts degree in Law & Society. She is a very hardworking, determined, and strong-minded individual, which is clearly demonstrated in her advocacy for social justice and global change. As an individual with Achondroplasia, a form of dwarfism, her limbs are shorter than her average counterparts, making it difficult to go about everyday life. However, such limitations does not stop her as she constantly takes up various employment, volunteer, and other occupational opportunities with the intention to live her life as normally as possible and aid others in doing the same.

## Matthew Tracey

Matthew was diagnosed with CMT when he was eight years old. It became noticeable, when he started tripping while walking and would frequently lose his balance, it became apparent that something was wrong. At first, he was fitted with night-time leg braces hoping it would realign his feet and legs, but he began wearing braces during the day when he was ten years old and has been wearing them ever since. Over the years as his fine motor skills weakened, Matthew has had to adjust how to do things. However, he has always kept a positive mindset while living with his disability. He is pursuing his Honours Bachelor's Degree of Commerce/Accounting at the University of Ottawa.

## Dean Wardak

Dean Wardak is a student at York University, and he is entering into his third year of study. He has a C7 spinal cord injury and an acquired brain injury. He is in the Professional Writing program because he wants to become an author and journalist. He wants to write an autobiographical novel about his life's journey after his car accident because Dean knows that he has a story that other people would benefit from learning about.

## **2021/2022 Ryerson TGF Recipients**

### **Jaylin Evans**

Jaylin is a third-year student at Ryerson University studying the Creative Industries program. Her program focuses on business essentials, communications, and the music industry. She was inspired to go to Ryerson University after finding the Creative Industries program and thought it was the perfect balance between business and the creative fields, she was interested in. While in her program, she has had the best experience as she took on leadership roles including being the first-year representative on the Creative Industries course union. Currently, Jaylin is the VP Sponsorship on the committee and loves her job. Additionally, she is an aspiring radio show producer and hopes to pursue that upon graduating with her undergraduate degree in 2023.

### **Kayla Javadifar**

Kayla chose to pursue Biomedical Engineering at Ryerson because of her love for all the possibilities in the field of STEM, and that she could incorporate her creativity and problem-solving skills into engineering solutions that could impact and improve people's health. In her free time, she enjoys contributing to biomedical engineering research at her university and volunteering. She has aspirations about contributing to future research in the field of pediatric rehabilitation to improve the lives of children with disabilities and improve accessibility throughout her career.

### **Jamie La**

Jamie is in his fourth year in the Accounting and Finance program at Ryerson University, with a major in accounting and a minor in professional communications. His expected grad year will occur in 2023 after he completes two more academic semesters and two more co-op semesters. He has been very active with student groups, such as the Ted Rogers Students' Society, DECA Ryerson, and the Top 200 Program. He is also a co-op student and has landed two co-op offers at two Big 4 accounting firms (PwC and KPMG).

Jamie's goal is to become a CPA (Chartered Professional Accountant) and pursue the ladder of his accounting career by always showcasing his hard work and dedication.

### **Cordelia Sheppard**

Cordelia Sheppard is in her 4th-year of nutrition and food at Ryerson. She plans to graduate in Fall 2022. She started at Ryerson in 2018, transferring from Western University in an alternate program.

Her professional career goals are to complete her degree, become a Registered Dietitian, and improve global food and water security while prioritizing minority populations and preventative medicine approaches.

## DONORS AND SPONSORS 2021

(We apologize for anyone we may have inadvertently left off this list;  
please contact if your name was omitted)

### INDIVIDUALS

Joanne Abeles	Candace Grey	Monica Tessier
Marva Amour	Madge Henderson	Daphne Tucker
Terrance Arrindell	Roma Hewitt	Rose-Marie Walker
Phyllis Babb	Milton Houston	Dean Wardak
Sylvia Birch	Osmond Lyons	Nancy Xia
Joshua Fogah	Sonia Parris	Yuhua Xia
Delroy Gordon	Ewart Ritchie	Daniel Young
Marcia Gordon	Judy Samuels	
Tamara Gordon	Yue Song

Education Assistant, Spinal Cord Injury  
Ontario

Monica Tessier,  
Director

Lawyer, Gibbs & Associates

Candace Grey,  
Director

Employee, Toronto Transit Commission

## Tamara Gordon Foundation Background

Tamara Gordon is the founder and Vice President of the Tamara Gordon Foundation. She was a bright 16-year-old athletic secondary school student whose future aspirations were forever altered because of a skiing accident in 2002; this left her paralyzed from the waist down and partial paralysis of her left arm when she was in Grade 11. Despite significant health and financial issues, Tamara refused to be diverted from her dream of completing her university education. In 2009, she graduated with a B.A.S., Spec. Hons. Administrative Studies Degree, with honours, on the Dean's Honour Roll list and distinction *Cum Laude*, from York University. During her studies, she was the recipient of over 60 scholarships and awards.

Along the way, Tamara also made a commitment to help and encourage other students with physical disabilities through her motivational speaking engagements. According to Tamara, "the idea of being a motivational speaker came about from my experiences and struggles as a student at York University". She was also the Undergraduate Student Representative for students with disabilities at Access York meetings and from her experience on and off campus the idea of establishing a foundation was embedded in her heart and she pursued this vision to completion.

Arising from her own personal experiences, Tamara developed a strong desire and deep commitment to provide financial support to aspiring students with physical disabilities, who are deserving of financial assistance to achieve their postsecondary educational goals. That has resulted in her establishing the Tamara Gordon Foundation. She understands the obstacles that often confront people with physical disabilities in the attainment of their intellectual development, thereby affecting their ability to compete for good jobs and contribute to the future of their family and the Canadian society. In 2021, Tamara Gordon Foundation has provided financial awards ranging from \$1,000 to \$2,500 to students with physical disabilities and enrolled in degree programs at postsecondary institutions within Ontario.

The Tamara Gordon Foundation was approved as a Registered Charity in December 2013. A Board of Directors consisting of ten members drawn from a broad spectrum of the community was then working to identify volunteers, private and corporate donors, as well as partners in the post-secondary and non-profit sectors. The purpose of the Foundation is not only to provide financial assistance to students with physical disabilities in the achievement of their educational goals, but also to help them in making the transition to employment as full contributing members of society.

Initially scholarships were awarded only in the Greater Toronto Area (GTA). In 2014 six scholarship recipients were honoured and in 2015 eight. Tamara also awarded one private scholarship to a student who was qualified but was not studying in the GTA. In 2016 the Foundation approved extending its perimeters to cover Ontario Colleges/Universities and the number of recipients helped annually continues to increase; twelve recipients in 2016, seventeen in 2017, twenty in 2018, twenty-six in 2019, and twenty-four in 2020. I am proud to report that this year we will be awarding twenty-two scholarships. With our partnership with Ryerson University, we will award scholarships to four students for a specified amount which will be matched by Ryerson. This brings our total scholarships for 2021 to twenty-six. Over the past eight years we have awarded 147 scholarships for a total of over \$220,000.00, a true testimony of our commitment to students with physical disabilities and the community. Through the years many student volunteers have secured their required volunteer hours by assisting at our events.

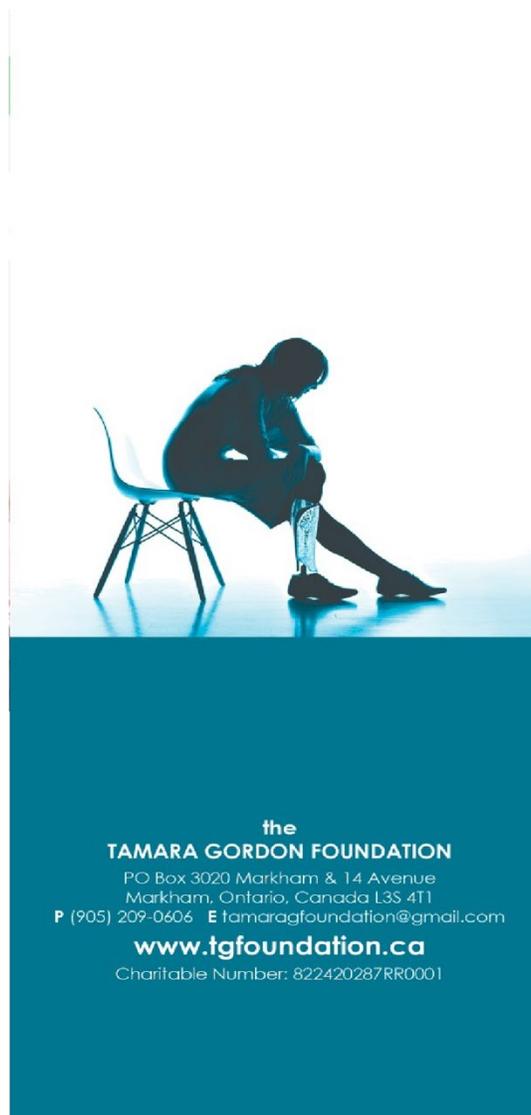

As our faithful, generous Donors and Sponsors, we are truly grateful for your ongoing support. The encouragement we receive from you fuels our determination to sustain the Foundation as we continue to seek new avenues to expand our mandate of “Making Higher Education Accessible”. Your generous donation and sponsorship to the Foundation will be greatly appreciated as we cannot do this alone.

With heartfelt appreciation to ALL.
